# South Beach Smoke Deluxe Review

The nicotine was noticeable and did the job just fine and the battery life of the e-cigarette remained a good charge so far just like most others I've used. Overall I give this e-cigarette a 9/10 for good flavors, usability, simple design(2-piece) and nicotine level accuracy. The only thing this e-cigarette was not big in the way is of the thickest of vapor. It does have some though don't get me wrong but I noticed you have to puff more frequently to get it going good and thick. If your a frequent puffer kind of smoker than this might be perfect for you. I am definitely a heavy puffer myself so I don't mind.

Ok, for the price of this South Beach Smoke Deluxe Starter Kit I couldn't believe it really. \$49.99 and they are including the \$100 gas card with it! I know it will probably take forever for the gas card to get to me but it's free gas none the less. This isn't my favorite e-cigarette yet but I must say for the price not freaking bad! If your on a tight budget or just starting out and don't want to heavily invest in the e cig, this is great quality for the buck so here ya go...
