V2 Ultimate E Cigarette Review

Multiple Options For V2 Cigs

I also like that when ordering you can choose different battery lengths some of which have different options for the led colors. I personally don't care for the 120mm battery, even if it lasts for 300 puffs it is still long enough and heavy enough that it feels cumbersome to me. (Also, be warned: the 120mm battery does not fit in the carrying case) The shortest battery feels the most natural to me, as I am an ex smoker and I never smoked 100s. I ordered two short batteries and one standard size with my kit, and that seems to work out well for me. I also got the portable charger (its cool, it looks like a little cigarette tin) which is a nice feature not offered by a lot of other brands. Having that allows me to use the shorter e-cigarettes and not have to worry about them running out of energy while I'm out.

Possibly the most convincing thing of all about the V2 e-cigarette model is that out of all the e-cigarettes I tried it seemed to have some of the thickest, most consistent, and best tasting vapor produced. The next two in line for a consistent thick vapor are the White Cloud and the Green Smoke e-cigarettes, neither of which offer a portable charger or the button battery option that I was originally skeptical of, but began to prefer after using it. (I would suggest if you order a kit with more than one battery option, you try it out). Also the V2 e-cigarette allows for more

options all around and is priced a bit cheaper than White Cloud e-cigarette (comparable with Green Smoke e-cigarette). Also, the small black batteries with the colored “filters”, in the sleek black carrying case, has a nice aesthetic to it.

I never really smoked flavored cigarettes as a smoker, but some of their vapor flavors are excellent, like the cherry, it feels like smoking but leaves a slight candied taste that is really pretty good. The other flavors, vanilla, chocolate, coffee, are good as well, and the cowboy and congress flavors (modeled after Marlboro reds, and parliaments, I think) taste and give a throat kick more akin to a real cigarette than most other brands I have tried.

Everything considered, the different battery and flavor options, the quality and consistency of the vapor produced, and the relatively cheap price for the quality of the product make the V2 e-cigarette my first pick of all the e-cigarettes. I got my kit a couple weeks ago and I have been quite happy with it. Best part is, I was smoking a coffee flavored cartridge off my short black battery with the button (my favorite), while I wrote this, in my house, that I am not allowed to smoke in because I rent, with the windows up, cause its cold outside!

Thanks for reading my V2 Cigs review! I hope you found it helpful.

Give the gift that lasts a lifetime with V2 Cigs kits, cartridges, batteries and accessories including the newly-launched [V2 Platinum E-Liquid](#).
