Get Any Video Game You Want For As Lowest Price As You Can.

You Post - Sellers Bid - You Save

How Reverse Auction Works?

Step 1. You start the reverse auction by posting your order for free and by specifying in detail what you want to buy. Sellers compete against each other at AEGamesAuction.com, in real-time auctions to win you as a customer, driving down the price in the process. They are given a specified time frame within they have to submit their offers. At the end, the lowest bidder wins the auction. You, as a buyer, have an option to choose a different bidder (seller) from among the participants if you desire so.

Step 2. You monitor the activity: The Reverse-Auction is held until the scheduled end-time. Multiple sellers can participate in the bidding process.

Step 3. After the bid ends you have 24hrs to decide and let us know if you want the contact information of more than one seller. You receive the seller's contact information and can make contact with them for your final qualification and decision. If you do not select anyone in the initial 24 hrs period, the lowest bidder becomes the winner. Service reverse auction fees due are charged to the seller.

How To Get The LOWEST PRICE In Reverse Auction?

For any person or business, the ability to buy more products for less money is a recipe for success. The trick of course is how to do it. We at AEGamesAuction.com offer a solution that plays an important role in helping you as a person or organization to reduce spending and therefore allow more cash leftover for other things.

There are several things you can do to get the lowest price possible:

1. Set the starting (maximum) price low - By setting up the price very low will make sure that the sellers will have to bid even lower in order for them to sell you their product.
2. Invite recognized suppliers - industry leaders or suppliers available in our database that have already won auctions in the past. If there are no suppliers in your category, we'll find them for you (this service is Free) and bring them to your listing on AEGamesAuction.com.
3. Conduct the second round reverse auction - by conducting the second round the sellers will see how low other competitors are willing to go and therefore they will try to do even better.

About Us

AEGamesAuction.com is a marketplace where sellers can easily list their video games, accessories and systems for free and Buyers can easily browse and compare between thousands of products.

Sellers can create their own store for only \$9.99 and receive a powerful admin tool to manage their online stores. All products are posted to Google Product Search as well.
